COURSE OVERVIEW

MASTER THE ART AND SCIENCE OF NOSE SURGERY

This program has been thoughtfully customised for surgeons interested in the art of **RHINOPLASTY**. The course focuses on in-depth and comprehensive training in the basics as well as advanced concepts of rhinoplasty techniques, to benefit both novice and veteran surgeons.

Pre-operative rhinoplasty assessment, surgical planning, simple and advanced rhinoplasty techniques, post-operative advice and recovery, complications and their management, will all be taught in detail.

The training will happen in the operation theatre with live surgeries. Rhinoplasties for different indications will be performed over the duration of the course. These interactive OT sessions will give ample time and opportunity for hands-on, to ask questions and learn the intricacies of every surgical step. The trainees get an unparalleled chance to be personally mentored by International famed Rhinoplasty Surgeons and gain from their practical experience.

Admission & Training Process
